

Script2Shoot

AI-POWERED PRODUCTION PLANNING ASSISTANT

| The Bottleneck of Creativity

Manual Drudgery

Assistant Directors spend 8–12 hours manually breaking down a single feature script. Every scene, character, and prop must be logged by hand.

Human Error

Repetitive manual entry leads to missed props, actor clashes, and scheduling oversights that cost production thousands on set.

| Traditional Workflow Pain Points

A cycle that takes days for a single revision.

| The Script2Shoot Solution

**One PDF.
Seconds to Plan.**

Script2Shoot automates the entire breakdown process using advanced AI. We turn raw creative text into structured production intelligence instantly.

- Instant Scene & Actor Breakdown
- Intelligent Location Grouping
- Automatic PDF Report Generation

| Modern Technical Stack

Frontend

React + Vite for a blazing-fast, responsive interactive dashboard.

Backend

Node.js & Express handling PDF processing and storage.

AI Core

Azure OpenAI (GPT-4.1 Mini) for high-precision entity extraction.

| Powered by Azure OpenAI

100%
Automated Extraction

GPT-4.1 Mini Precision

We utilize specialized prompts to ensure the AI understands screenwriting conventions, sluglines, and parentheticals.

Our system doesn't just read text; it understands **production context**, identifying requirements that aren't explicitly stated.

Intelligent Dashboard

Automatic categorization of characters per scene.

Smart grouping of scenes by filming location.

Instant Reports

One-Click PDF Generation

Export professional, industry-standard reports for your entire crew in seconds. Script2Shoot uses PDFKit to generate beautiful, scannable documents including:

- Scene Breakdown Summaries
- Actor Call Requirement Lists
- Location Scouting Guides
- Props Master Checklists

DAY 1

📍 ClothesThatFit.com HQ

🎬 14 Scenes

👤 20 Actors

📦 30 Props

⚡ 5/10

🎬 Scenes (14)

👤 Actors (20)

📦 Props (30)

⚠ Requirements (5)

Large office set

Crowd scenes

Vehicle

Outdoor location

Warehouse location permission

🧠 AI Suggestion

Moderate production requirements. Plan equipment and crew in advance.

| Impact & Future Roadmap

Current Impact

Reduced planning time by 90%
and eliminated human
transcription errors.

Phase 2

Integrating Budget Estimation
and Crew Scheduling based on
scene complexity.

The Vision

A full OS for independent
filmmakers—from script to final
cut.
